

AGRICULTURAL MACHINERY PARTS

——DENSEN GROUP LTD.

About Densen Group

Brief introduction

Until 2022, Densen Group (registered capital 7M dollar, head quarter located in Shenyang, China） has 7 sub-factories （5 in OEM casting & forging fields), is the leading supplier who can provide one stop manufacturing and purchasing service in the fields of customized metal components in the north of China.

- **Densen Group's service scope as below :**

  Pattern design and manufacturing

  Manufacturing: Casting,forging,Stamping,Machining,Welding and fabrication

  On site quality control and before- delivery inspection

  Reverse Design.Upon customer's request

  Early Supplier Involvement upon customer's request

  After sales service

DENSEN-HY

Established in 2003,

Factory area : 20,000 m2.

Yearly casting capacity : 3,000 tons.

Employees : 180

Has 4 workshops:

Clay sand casting,

Resin sand casting,

Automatic mold production line,

Machining.

Machining ability:

Turning/milling CNC center, horizontal CNC center, Vertical CNC center, Boring, turning, milling, drilling, etc.

100% products sold to overseas market

Certificates: ISO9001-2015

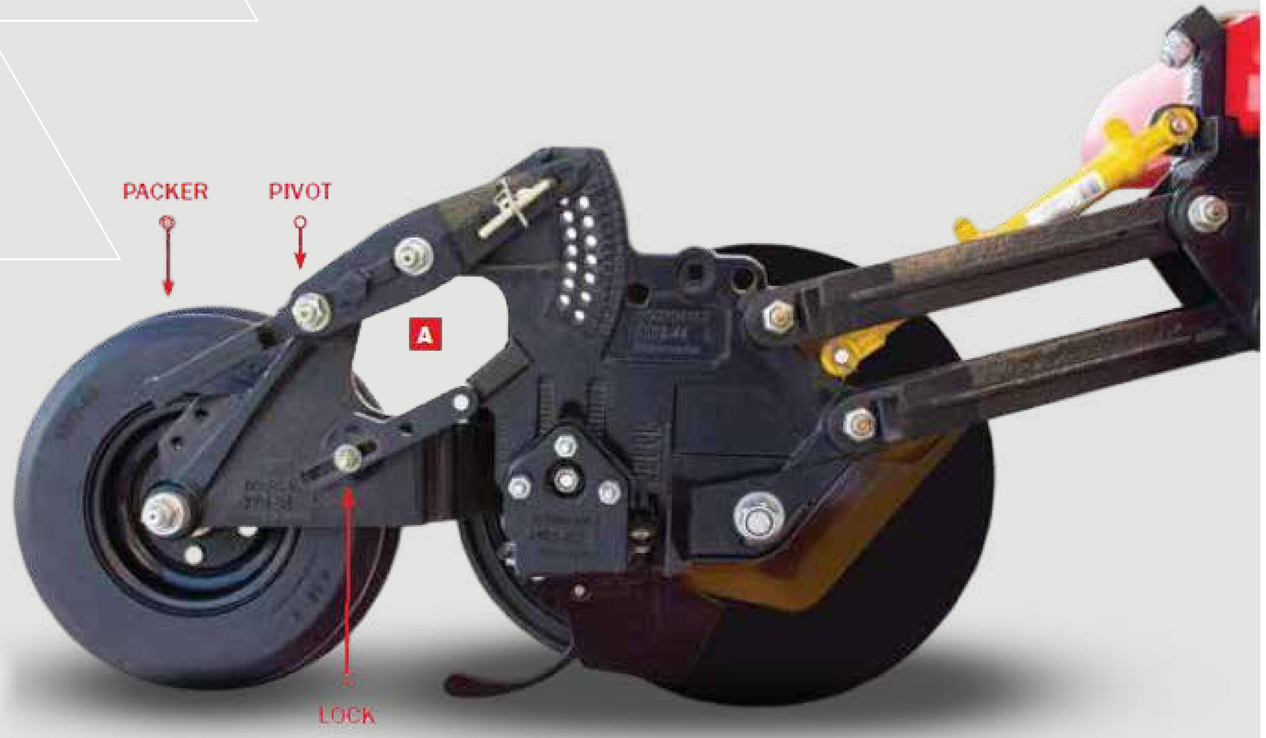

Casting parts for opener, raw unit, seeding system

Agricultural equipment Spare Part, such as arm, bracket, adjustment plate, closer wheel,
Cast tip, locking hook, gauge wheel arm and carrier, extension plate.
Used for opener, strip till unit, seed drill system, row unit, seeding system, stalk roller attachment and so on.

Material range: Cast iron(ductile iron, grey iron)， Steel (carbon steel, alloy steel, manganese steel)
Weight range: 0.01-500kgs

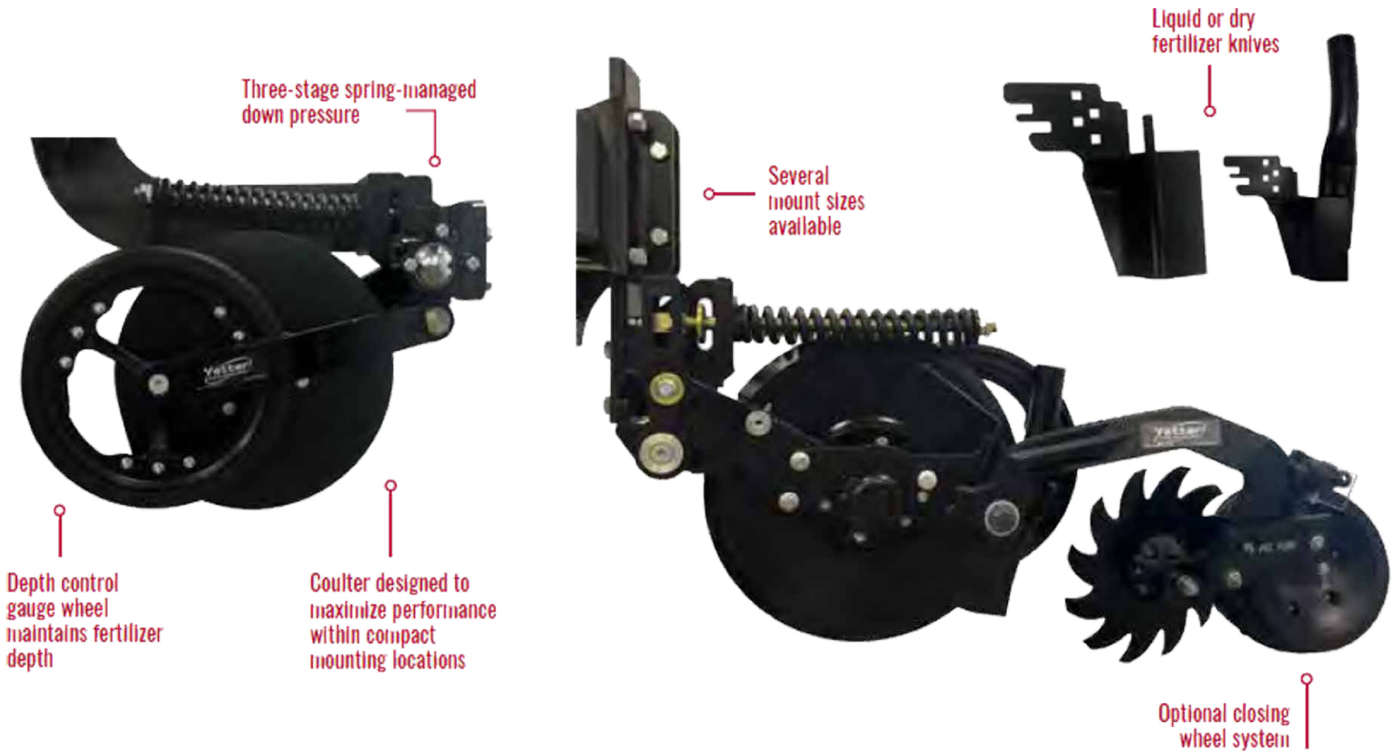

Casting parts for opener, raw unit, seeding system

Casting parts for opener, raw unit, seeding system

Agricultural spare parts

Material: Ductile iron, alloy steel

Process: sand casting, investment casting

Sand casting (Automatic mold production line and hand made mold)

Sand casting process Automatic mold production line Hand made

Machine workshop

- CNC machine center
- VMC (Vertical machine center)
- Fully automatic molding machine
- Fully functional CNC horizontal lathe
- Multiple spindle drilling machine
- Milling machine
- Boring mill
- Intelligent CNC lathe
- CNC vertical lathe
- Vertical drilling machine
- Centerless grinding machine
- Balancing machine
- Metal pressing machine
- Shot blasting machine
- Chip cleaner

Inspection equipment

Densen could supply inspection reports includes 3D scan, MPI, UT, RT, CMM, MTR, DMR and etc.

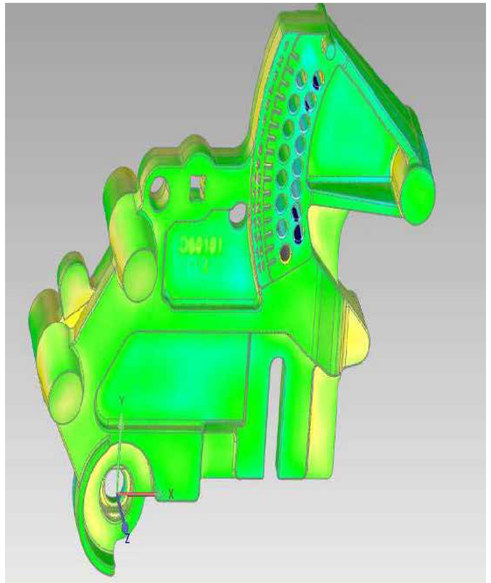

Inspection equipment includes:

- Spectormeter
- CMM(Coordinate Measuring Machine)
- Outline of the Measuring Instrument
- Roundness Measuring Instrument
- Measuring Microscopes
- Image Measuring Instrument
- Roughness Testing Instrument
- Linear Height

Package and delivery

Packed in wooden case with separate layers on the pallet, and lined with poly membrane inside, packing sound.
