# About US

## Densen Group

Densen Group has 6 own factories, over 50 sub- contractors, has strong capability to offer professional technical and process design, manufacturing for customized casting ,forging ,stamping ,machining ,welding and fabrication metal components for worldwide customers ,has more than 30 years manufacturing experience and 14 years direct export experience .50% of the products have been sold to world top 500 enterprises..

- **Densen Group's Mission :**

  Focus on customer demand, provide optimal industrial technical solutrions, produce great value for customers persistently.

- **Our Vision :**

  1.To be the leading provider of casting and forging technical solutrions in China.
  2.To be the most happiness enterprises for employee.

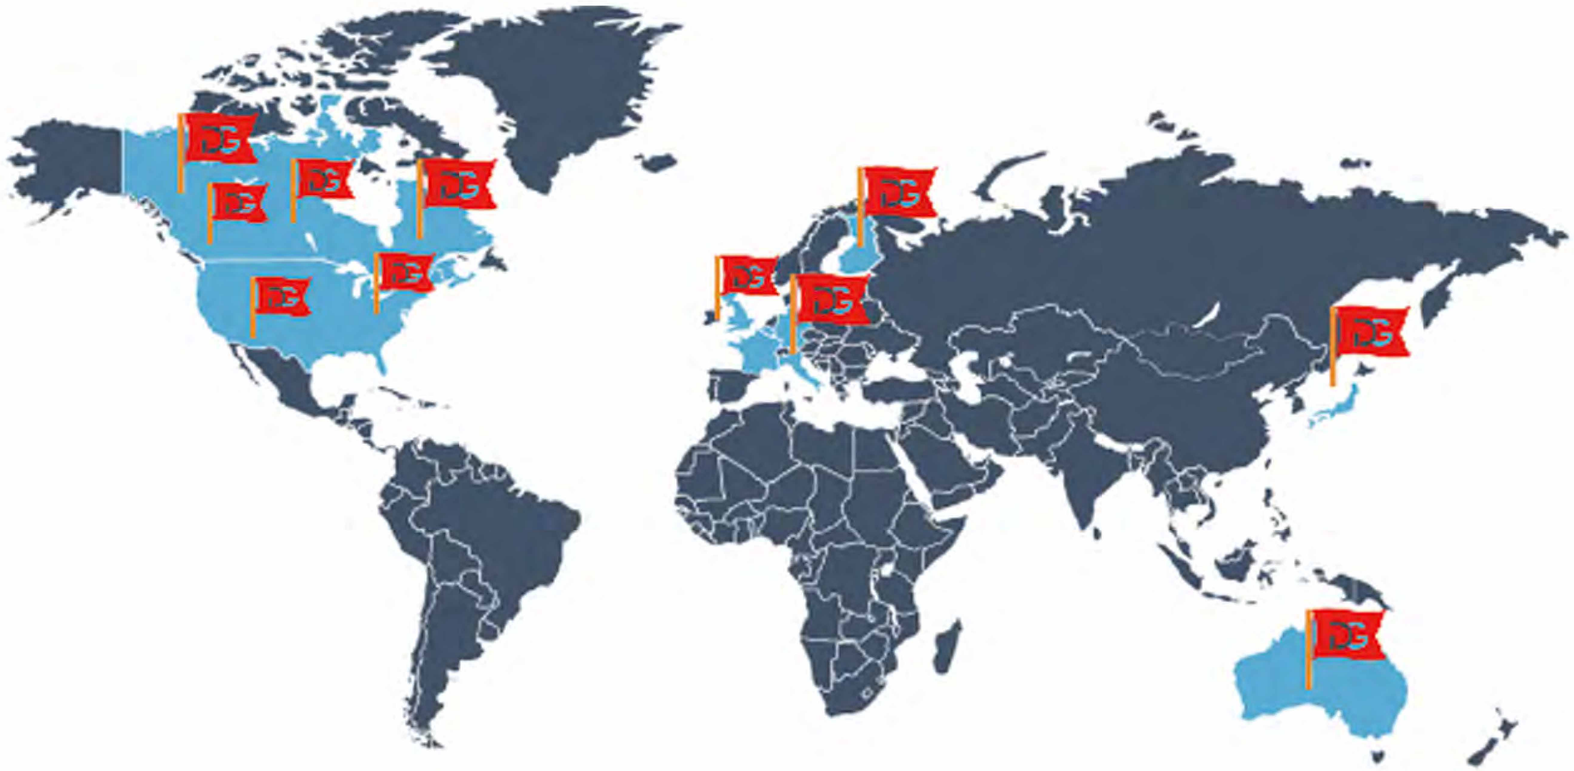

- **Our Value :**

  Quality and customer service is everything.

# Densen—DY

We possess a very powerful management team and a professional and ardent sales group, which guarantees the prompt decision-making, pleasant communicationand best service

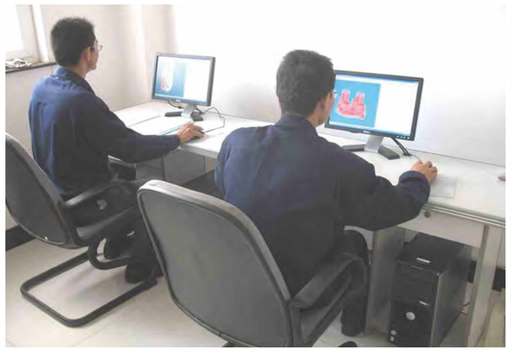

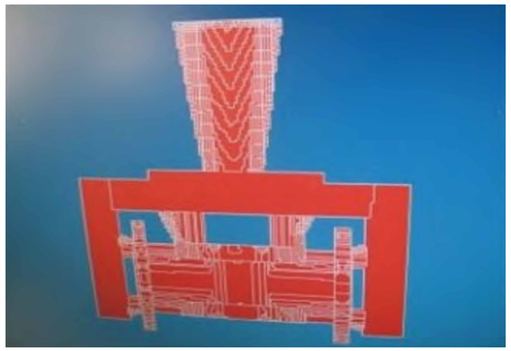

- Established in 1998
- Factory area: 6000m²
- Annual capacity: 1200tons
- Employee numbers:200
- Main Product: Pump Parts,Impeller, Volute and Valve Parts,Volute Casting, blower inlet casing,adapter,suction case some other machining parts, mainly 5 types with 3000 kinds.
- Qualification: ISO9001:2008 quality system and TUV/PED/AD-W2000 pressure vessel certificates and the Lloyd's Register for ship-building industry
- Main Market: 98% of our products have been exported to Germany, Italy, Spain, France, England, America, Canada, Singa-pore

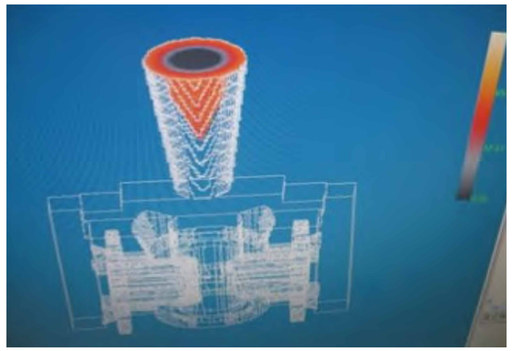

# Technical Capability

More than 15 years of design and production experience engineering team, design and develop more than 100 new products for customers every year.

Provide “**One-Stop service**” .

# Machining Ability

# Inspection Equipment

Inspection facilities: Spectrum analyzer, X ray machine,
Universal tensile machine, Brinell hardness， Metallographic Analyzer,etc.
Measurement facilities: CMM, 3D scanner, various measure & checking tools, etc.

# Products

- **Process :**

  Lost Wax Process, Silica Sol Techniques.

- **Main Products :**

  Pump Parts, Impeller, Volute and Valve Parts, Volute Casting, blower inlet casing, adapter, suction case some other machining parts, mainly 5 types with 3000 kinds.

- **Main Material :**

  Stainless Steel including duplex stainless steel,
  Carbon Steel and Alloy Steel.

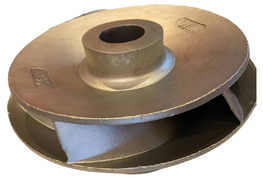

- **Specifications :**

  6g to 80kg
  600mm×600mm×600mm
